Commit to Master

Commit to Master joined together in 2019 for the sole purpose of creating web-based applications. We are a brand-new team of developers working together in the Web Development cohort program at Bellevue University, studying under Professor Krasso. Our coding experience includes HTML, CSS, and JavaScript programming languages while currently studying Node.js. We are passionate about learning and collaborating with one another to develop websites using the latest programming languages following current industry standards. Our team members include Andrew Hemminger (Team Captain), Jordan Hennessy and Gabriel Sanchez. We have 5 years combined experience in web development. We specialize in User Experience, not only do our applications look great, but they're user friendly, too! See our individual developer bios below for details about all of our team members. With our combined development experience, we are working hard together coding and collaborating to build a new webpage that will show off our experience and test your JavaScript knowledge.

Our Team

Andrew Hemminger

Aspiring web developer working toward a bachelors in web development at Bellevue University. Experience coding with HTML, CSS, JavaScript, PowerShell. Currently working at Nebraska Furniture Mart as a Test Automation Lead in the Software and Applications Development department utilizing the Microsoft stack. Following the Agile methodology with a focus on quality and automation. Transiting into the web development industry 2.5 years ago I really found a new passion for a career field. My background prior was electronics installation which involved some different types of coding to configure whole home automation systems which gave me the experience to put my foot in the door to become a software tester for the Nebraska Furniture Mart website. I work with a great team of people that are always willing to collaborate and share knowledge with one another helping to grow my skill-sets in all areas surrounding web development. I am striving toward completing my degree in web development at Bellevue University to help accelerate my career and become a better developer.
